

The Challenge Was To Create An Ultra-Hip  
Eliptical Design That Worked Aesthetically In  
A 150 Year Old Space...Infinity Did It!

In meeting this challenge, Infinity needed to produce a fully elliptical one piece stainless steel workboard assembly that not only had quality, style and flair but also fit like a glove. This is something that our competition won't even comprehend. Whatever the size and shape may be, Infinity specializes in

manufacturing custom underbars to meet the design requirements. It all starts with all-welded all 18 gauge stainless steel construction. When it comes to underbars, Infinity has no limitations!

*Simply the Best*
